

DESIGN

CAPABILITIES

- PROGRAMMING

We study your organization and provide solutions that facilitate a more productive workplace.

- SPACE PLANNING

We space plan with flexibility in mind to accommodate changes in occupancy over time in a cost effective manner.

- FURNITURE PROCUREMENT

We have developed strong relationships with leading furniture dealers to get you into the right seat.

- PROJECT MANAGEMENT

We work with your existing vendors to provide overall project continuity.

DESIGN SOLUTIONS THAT PREPARE YOU FOR THE BUSINESS STORM

At the “Design” entry point, Spatial DTI offers solutions to meet your programming, space planning, furniture procurement and project management needs. Our design process concentrates on the organizational relationships pertaining to your business. We study adjacencies, functionality, connectivity, space utilization and feasibility and comprise a solution to meet your spatial and technical requirements. Interested in LEED certification? We can take your organization through LEED analysis, compliance and certification. Already

working with a vendor? We can manage your project and bring continuity to the design process, or the entire facility lifecycle with moving and managing your facility. Our goal is to make sure your organization transitions from your existing facility to your new facility with minimal interruptions, on schedule and within budget. Not moving into a new facility? We can provide the same services in a reconfiguration scenario.
